

Poverty is not always apparent: In PEI, approximately 12% of the population lives in poverty.¹

1 Screen Everyone

“Do you ever have difficulty making ends meet at the end of the month?”

(Sensitivity 98%, specificity 40% for living below the poverty line)²

2 Poverty is a Risk Factor

Consider:

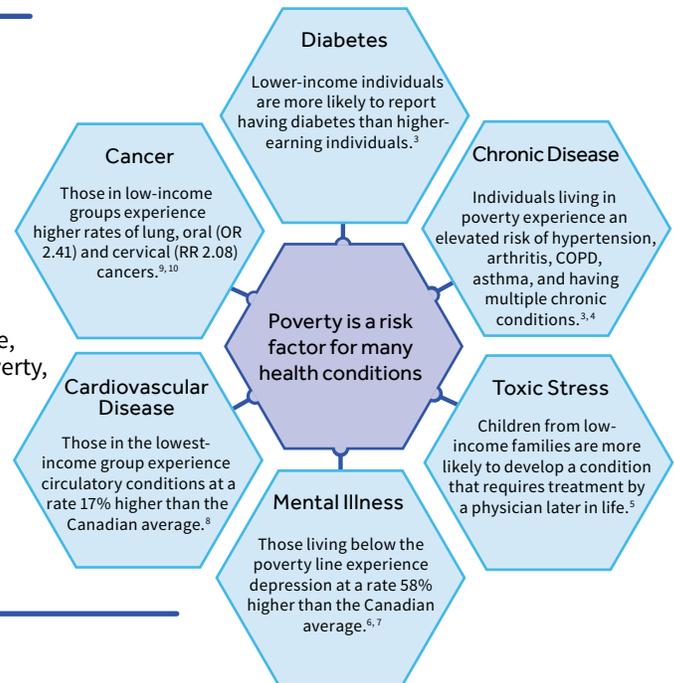

New immigrants, women, Indigenous peoples, and LGBTQ+ are among the highest risk groups.

Example 1:

If an otherwise healthy 35-year-old comes to your office, without risk factors for diabetes other than living in poverty, you consider ordering a screening test for diabetes.

Example 2:

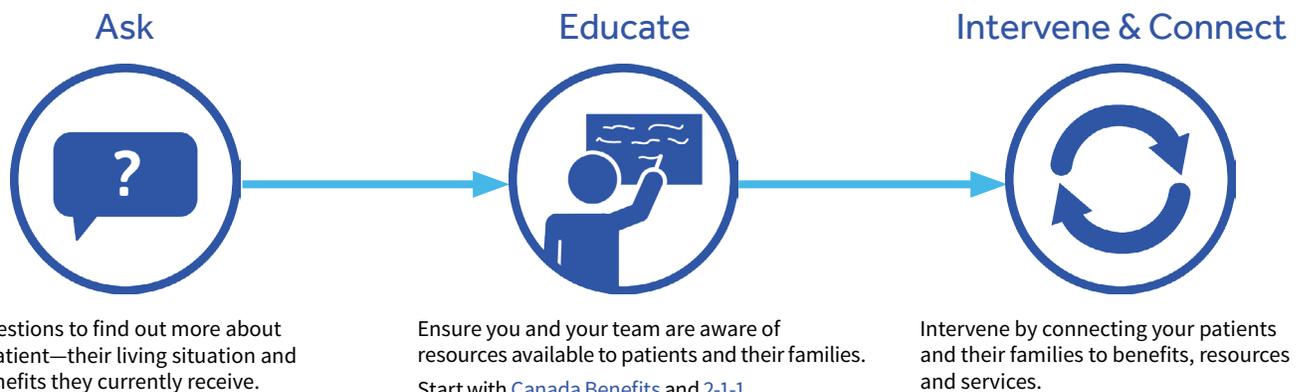

If an otherwise low-risk patient who lives in poverty presents with chest pain, this elevates the pre-test probability of a cardiac source and helps determine how aggressive you are in ordering investigations.

3 Intervene

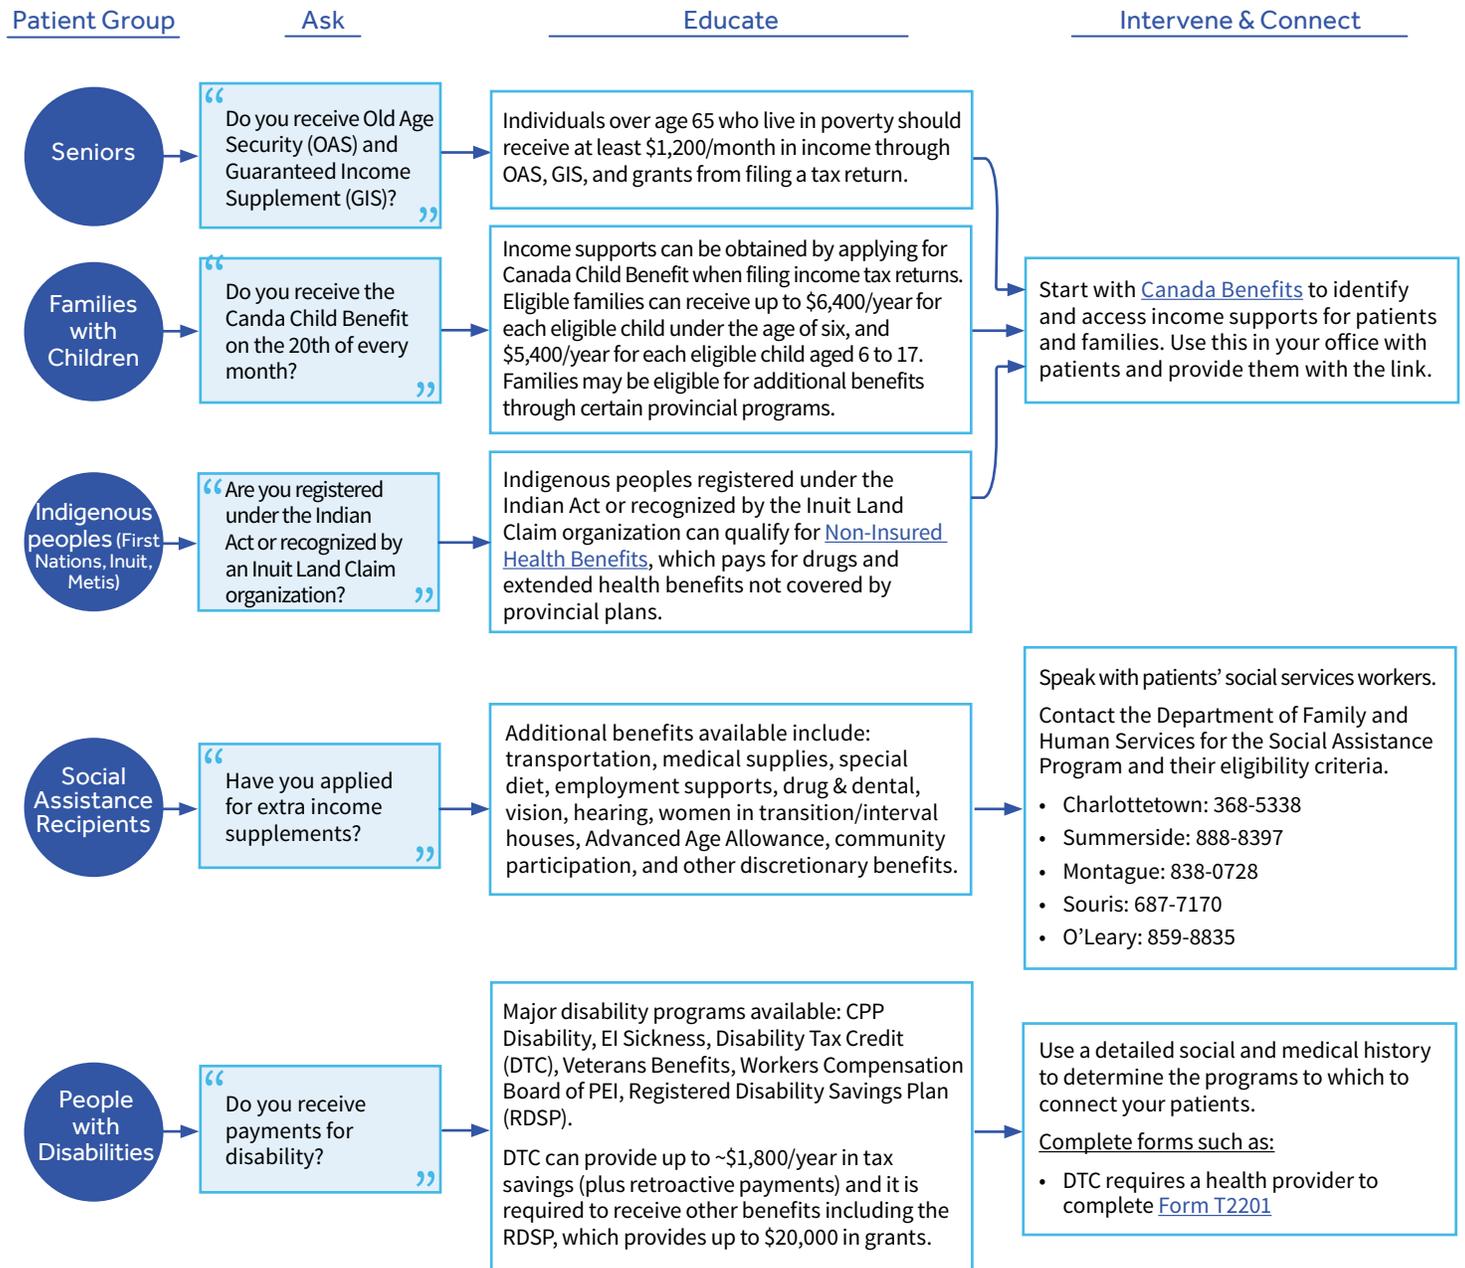

Ask Everyone: “Have you filled out and sent in your tax forms?”

- Ask questions to find out more about your patient—their employment, living situation, social supports and the benefits they receive. Tax returns are required to access many income security benefits: e.g., GST / HST credits, Child Benefits, working income tax benefits, and property tax credits. Connect your patients to [Free Community Tax Clinics](#).
- Even people without official residency status can file returns.
- Drug Coverage: The patient must have up-to-date tax filings and must have a health card issued by the Province of Prince Edward Island. For more information on drug coverage programs available and their eligibility criteria, visit healthpei.ca/pharmacare

more interventions on reverse

Intervening can have a profound impact on your patients' health

Key Resources

<p>Canada Benefits (www.canadabenefits.gc.ca)</p> <p>Provides a full listing of federal and provincial income and other supports, organized by personal status (e.g., “parent,” “Indigenous peoples”) or life situation (e.g., “unemployment,” “health concerns”), with links to the relevant program websites and to application forms.</p>	<p>2-1-1 (www.pei.211.ca)</p> <p>Call 2-1-1 or browse the website to find community support and advocacy organizations, based on topic and location.</p>	<p>Community Legal Information Association of PEI (www.clapei.ca)</p> <p>A non-profit, charitable organization offering free law information products and services to the entire province.</p>
---	---	--

Remember: As health care providers, it is our responsibility to provide complete and detailed information that accurately portrays our patients' health status and disabilities. It is **NOT** our role to serve as the gatekeepers for income security.

This Tool has been modified from the Ontario version that was originally developed as part of the Knowledge Translation in Primary Care Initiative which is led by CEP with collaboration from the Ontario College of Family Physicians (OCFP) and the Nurse Practitioners' Association of Ontario (NPAO). Clinical leadership for the development of this tool was provided by Dr. Gary Bloch MD CCFP and was subject to external review by primary care providers and other relevant stakeholders. This modified Tool was funded by the College of Family Physicians of Canada. The Ontario version of this tool was adapted from the version created in 2013 by Dr. Gary Bloch MD CCFP, Ontario College of Family Physicians and its Poverty and Health Committee. This tool is an adaptation of the Ontario tool.

This Tool was developed for licensed health care professionals in PEI as a guide only and does not constitute medical or other professional advice. Primary care providers and other health care professionals are required to exercise their own clinical judgment in using this Tool. Neither the Centre for Effective Practice ("CEP"), the College of Family Physicians of Canada (CFCP), the Prince Edward Island College of Family Physicians, nor any of their respective agents, appointees, directors, officers, employees, contractors, members or volunteers: (i) are providing medical, diagnostic or treatment services through this Tool; (ii) to the extent permitted by applicable law, accept any responsibility for the use or misuse of this Tool by any individual including, but not limited to, primary care providers or entity, including for any loss, damage or injury (including death) arising from or in connection with the use of this Tool, in whole or in part; or (iii) give or make any representation, warranty or endorsement of any external sources referenced in this Tool (whether specifically named or not) that are owned or operated by third parties, including any information or advice contained therein.
